REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the claims are allowable over prior art of record, because none of the references in alone or in combination discloses:

A method for determining a focus point of a light source and lens,
the method comprising:

- directing light from a light source through the lens and onto a target surface, the light source being positioned on a first side of the lens and the target surface being positioned on a second side of the lens;
- detecting, at a position on the first side of the lens, a reflection of the light from the light source reflecting of the target surface;
- making a determination, based at least in part on a focus characteristic of the reflection, whether the position on the first side of the lens would be sufficiently in focus for a second light that would originate from near the target surface, as discloses in claims 1, and 18.

The underlined limitations is critically, since the method is improvement even the optical fiber with the cross-sectional diameter very small, the laser beam and the optical fiber have to be aligned precisely with one another.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
